Editorial

147 Adult neuroplasticity: A new “cure” for major depression?
P.R. Albert

Review Papers

151 Unilateral and bilateral repetitive transcranial magnetic stimulation for treatment-resistant depression: a meta-analysis of randomized controlled trials over 2 decades

164 Genetic, epigenetic and posttranscriptional mechanisms for treatment of major depression: the 5-HT1A receptor gene as a paradigm
P.R. Albert, B. Le François, F. Vahid-Ansari

Research Papers

177 Multisensory integration underlying body-ownership experiences in schizophrenia and offspring of patients: a study using the rubber hand illusion paradigm
M. Prikken, A. van der Weiden, H. Baalbergen, M.H.J. Hillegers, R.S. Kahn, H. Aarts, N.E.M. van Haren

185 Neurobehavioural mechanisms of threat generalization moderate the link between childhood maltreatment and psychopathology in emerging adulthood

195 Reduced parietofrontal effective connectivity during a working-memory task in people with high delusional ideation

205 A longitudinal, epigenome-wide study of DNA methylation in anorexia nervosa: results in actively ill, partially weight-restored, long-term remitted and non-eating-disordered women
CCNP News and Views

Psychopharmacology for the Clinician

N-Acetylcysteine augmentation in refractory obsessive–compulsive disorder
S. Bhaskara

Service Information

The Journal of Psychiatry & Neuroscience publishes papers at the intersection of psychiatry and neuroscience that advance our understanding of the etiology, pathophysiology and treatment of psychiatric disorders. This includes studies on patients with psychiatric disorders, healthy humans, and experimental animals as well as studies in vitro. Original research articles, including clinical trials, and review papers will be considered.

All editorial matter in the Journal of Psychiatry & Neuroscience represents the opinions of the authors and not necessarily those of the publisher. We assume no responsibility or liability for damages arising from any error or omission, or from use of any information or advice contained in the Journal of Psychiatry & Neuroscience, including articles, editorials, reviews, abstracts, letters and advertisements.
