

Correction to “Navigated and individual α -peak-frequency-guided transcranial magnetic stimulation in male patients with treatment-refractory schizophrenia”

JPN has been made aware of an error that occurred in a paper published on Mar. 1, 2024.¹ The abstract noted that scores on the Positive and Negative Syndrome Scale were higher in the treatment group than the sham group; this is an error as scores were lower.

This has been corrected at jpn.ca.
